www.medisco.co.uk

The **Medisco** range of sophisticated, multi-purpose trolleys offer a wide range of uses for the medical profession via hospital wards, nursing homes and GP surgeries to providing storage systems or workstations for many outlets. All our trolleys share the same design philosophy of size and working height to meet environmental and ergonomic studies, while establishing the required standards for hygiene and security.

Efficient

Spacious, compact, manoeuvrable - all Medisco trolley contents and accessories are accessible without disturbing work surfaces. Worktops have a lip to contain spills. Drawers are specially mounted for smooth operation and can be removed easily for cleaning.

Reliable

The specification and build quality of Medisco Trolleys ensure a very high level of reliability. Maintenance is minimal.

Secure

Our trolleys can be secured with a tamper-evident, easily broken seal. You can be confident that the trolley is ready for instant action with its contents undisturbed while sealed.

Colour coded

Medisco trolleys are colour coded for each purpose – other colours are available on request.

MEDISCO MEDICAL SYSTEMS

designed with care for those who care

A division of the well-established Redman Sheet Metal, handling only the finest quality steel suited for the medical environment. Our in-house facilities to manufacture and maintain a true British quality standard allows you to specify a trolley to exact local requirement complete with a comprehensive range of accessories, which can be ordered individually.

Quality Assurance

We have operated under ISO 9001: 2000 accredited quality system since 2003. The controls are systematically audited on a regular basis reinforcing our commitment to supply quality products to the health industry.

products

RESUSCITATION 3 4

The Medisco Resuscitation Trolley range takes care of every aspect of an emergency situation. Comprising the widest range of ancillary equipment and accessories.

PAEDIATRIC 5 6

IPD 936 Medicine Trolley

The Medisco Patient Dispensing Medicine Trolley range is a secure, efficient and a convenient system for storing and distributing medicines. The IPD936 is supplied with 36 individual patient bins, which can be easily removed for convenience of dispensing medicines and restocking.

- Removable bins are arranged in drawers of six to accommodate medicine for each individual patient
- Double width bins are also available – catering for fewer patients
- Each bin has a label holder and up to four dividers can be fitted, each with a label holder
- Wire baskets for stock bottles
- A waste bin and water jug are built in
- A lectern can be added as an extra option

IPD Standard Trolley Range

- 18 patients IPD 918*
- 24 patients IPD 924*
- 30 patients IPD 930
- 36 patients IPD 936

*There is space for additional patient drawers in these models

Convenient

2 Wire Baskets in Supplies Drawer

Water Jug

Lock Box

IPD AND MP MEDICINE – ACCESSORIES

SECURE

The trolley's steel construction is intrinsically safe and will withstand all but the most determined (and noisy) physical attack. Only the IPD range has a high security lock and a standard wall lock restrict access.

There are two visible indicators that the trolley is open. One key releases the trolley from the wall and unlocks all the drawers. No key is needed for re-locking. The drawers can be slam-locked after the central lock has been activated. Each high security lock is unique - key blanks are not available to casual buyers. Suites of keys with a master can be arranged. The lock core can be changed on site if security has been compromised by key loss.

The no-key slam lock facility, besides adding to the security of the trolley, is a major aid to efficiency.

EFFICIENT

Individual Patient Dispensing offers a very high degree of efficiency. It can reduce medicine round time by up to 40% with no loss of accuracy controlling medication through the mandatory separated storage.

CONVENIENT

All features of the trolley are accessible without disturbing the work surfaces. As an option, the lectern is a useful aid to dispensing. Each can be labelled and sub-divided (perhaps into daily doses).

The worktop has a lip to contain spillage. A folding side shelf can extend the working area. The lectern is a useful aid to dispensing as an option.

The drawers have easy glide runners and lift out for cleaning.

The big 125mm castors make movement easy. The non-marking bumper protects the trolley and its environment.

The exposed part of the patient bins is double skinned.

ECONOMIES

The IPD system will help to save money:

- Better control of expensive drug distribution;
- Patient compliance is easier to monitor thus saving wastage;
- Unused stocks are more easily recovered.

TERMS AND CONDITIONS

VAT

All prices quoted exclude VAT. HM Customs will allow zero rating for certain (but not all) Charity purchases; a valid exemption certificate is required with order. Late presentation of this certificate will incur an administration charge.

Loaned Equipment

We loan demonstration trolleys for evaluation purposes without obligation. Damaged units will be charged at cost of repair.

Re-stocking

Credit for returned goods is subject to a re-stocking charge at our discretion.

Small Orders

Orders of a value of less than £30 will be subject to a £5 small order surcharge.

Payment

Invoices are presented E & OE and terms of payment is 30 days from receipt of invoice for account customers. Goods for non-account customers will be dispatched on receipt of payment. Goods remain the property of Medisco Medical Systems until paid for in full.

NHS Orders

Goods will not be supplied to NHS establishments without an official written order.

Warranty

All goods are warranted for use in accordance with current legislation.

Manufactured in the UK

Specifications are subject to change without prior notice.
